

Empowering Oncology Care: Harnessing Patient Reported Data and Insights to Transform the Patient Experience.

Sciensus sponsored symposium at UKOF 2024
Thursday 13th June 2024 | 10:30 – 11:10

Overview

Please join us to explore how digitally enabled, patient reported data can help transform the patient experience.

Don't miss the opportunity to ask our Medical Assurance Director, Professor Chris Nutting, any questions you may have about the role of patient data and insights during the Q&A session.

Agenda	
10:30	Welcome and introduction
10:35	Empowering Oncology Care: Harnessing Patient Reported Data and Insights to Transform the Patient Experience
10:55	Q&A
11:10	Meeting close

Please email Lisa Young (lisa@athenameetings.com) if you would like to attend this symposium.
CPD accreditation for this symposium has been applied for.

Professor Chris Nutting

(MBBS MBA FRCP FRCR MD PhD FMedSci)
Medical Assurance Director at Sciensus,

Professor Chris Nutting is a distinguished clinical oncologist renowned for his expertise in head and neck cancer treatment. With a career spanning 25 years in London's most prestigious medical institutions, Prof. Nutting is recognised for his pioneering work in new therapies for cancer patients and delivering world-class research. As a prominent figure in oncology, he plays a pivotal role in shaping cancer treatment strategies and advancing therapeutic innovation internationally. He holds a significant role as a Professor and Consultant Clinical Oncologist, contributing extensively to cancer research through clinical trials and publications. Prof. Nutting's dedication to improving patient outcomes and his leadership in oncology make him a respected figure in the field, impacting countless lives globally.

We look forward to welcoming you to this symposium!
